DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 22, 2007, has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 18-35 and 42-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. As written, it is unclear as to what applicant regards as his invention, a method for manipulating a database of words or a method of converting text to speech. It is unclear how a method for conditioning a database produces synthetic speech.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2626

5. Claim 42 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 42 is directed to “a neural network,” and recites various limitations for manipulating relationships between graphemes, phonemes and words. Claim 42 recites non-statutory matter because (1) it does not fall within one of the four statutory categories of subject matter under 35 USC § 101, and (2) it is directed to an abstract idea. The claim does not seek the protection of a physical process, product/machine, article of manufacture or composition of matter or improvement thereof. The neural network does not represent functional descriptive matter embodied in a usable medium, which if imparted to a computer would cause a computer to implement a process or become a specialized machine.

Allowable Subject Matter

6. Claims 36-41 are allowed.
